

Acuant MedicScan®

Intelligent Data Capture & Auto-Fill

AUTOMATE TO INCREASE OPERATIONAL EFFICIENCY & REDUCE CLAIM REJECTIONS

Acuant MedicScan® automates patient data intake to speed up registration and prevent costly errors. Simply scan IDs and insurance cards to directly auto-populate your PM/EMR/EHR application in seconds! Acuant offers **AssureID™** identity verification and facial recognition technology in the same workflow to provide more security, prevent healthcare fraud and patient data mismanagement. Privacy minded, Acuant never stores data locally or in the cloud and aids in meeting healthcare regulations.

✓ Workflow Optimization

- Eliminate photocopying IDs, manual errors & paperwork
- Get claims approved faster & the first time with accurate data

✓ Secure Patient Identity Data

- No data or images are stored locally to protect PII
- Authenticate IDs & engage facial recognition match to prevent fraud

✓ Patient Centric

- Reduce patient wait time & per patient registration time
- Put focus on the patient with less paperwork

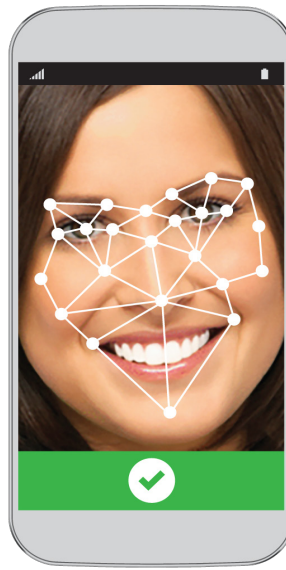

Acuant MedicScan®

Upgrade Workflows & Security in the Same Process

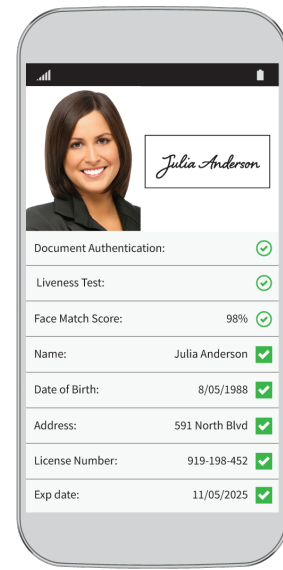

Upgrading patient experiences by leveraging technology is not only important to achieve patient satisfaction, but it is also a matter of security and becoming mandatory. Acuant solutions allow you to be compliant today and stay ahead of the curve, creating the most value for your healthcare operation. Protect your patient identity data & prevent fraud with cost efficient solutions.
